- Good understanding of Restful API. Have knowledge of Single Page Applications and Multi Page Applications
- Have knowledge of OOP, SOLID principles. And I can optimize performance, enhance UI/UX, propose tech.

WORK EXPERIENCE

Full Stack Developer & CO-Founder
Chinta Viet Nam Co.,LTD   *01/2020 –06/2023*

Project: Chinta Coffee (Dev team is only me)
- Chinta is a startup. The startup operates in the field of F&B. My responsibility is developing these applications below to manage the coffee shops of Chinta, inclusions:
  - **Chinta POS**: the web application allows staff to use with main functions: create invoices, inventory, shift reports...
  - **Chinta Merchant:** the web application allows store owners to use with main functions: manage revenue, manage staff, manage the shift of staff, manage salary, manage inventory, report ...
  - **Chinta Staff:** this web application allows staff to use with main functions: register the working schedule, view the working schedule, view salary ...
  - Chinta Merchant Mini app: the mobile app allows store owners to use to view sales index report
  - Mobile app: https://play.google.com/store/apps/details?id=com.chintavietnam.chintacoffee
- **Technologies:**
  - **Front End:** AngularJs, Bootstrap 4, Javascript, JQuery ...
  - **Back End:** NodeJs, ExpressJs, Swagger, Sequelize
  - **Database:** PostgreSQL
  - **Mobile App:** React Native, Expo
  - **Cloud Computing Platforms:** Heroku

Front End Developer
TMA Solutions, Quang Trung Software City   *07/2017 – 07/2019*

Project: Omnivista Cirrus (the team more than 30 members)
- The project develops the system base on the web application to manage the network devices of customers from the USA
- **Technologies:**
  - **Front End:** AngularJs, Bootstrap 3, Stylus, Javascript (only use ES5)
  - Implement proxy server by Nodejs
- **Responsibilities:**
  - Implements new feature on demand through tasks on Jira
  - Fixing bugs and enhancing features.
  - Review code and help the project manager to mentor junior members of the UI team. Sometimes, I also refactor the code of junior members whom I mentor
- **Others:**
  - Here, I got to join a Scrum team that uses the Alige Scrum software development process
  - I joined the R&D team when I work here

Junior Javascript Developer
IMT Solutions, Tan Binh, Ho Chi Minh City

04/2017 – 06/2017

- In this company, I have joined a project which develop a website application used to rating images or videos by the users
- **Technologies:** Nodejs, ExpressJs, Swagger, MongoDB
- **Responsibilities:**
    - I have trained in Nodejs and modules of Nodejs
    - Fixing bugs
    - Implement a simple API gateway to CRUD

Internship
ISC-Quang Trung, Quang Trung Software City

12/2016 – 04/2017

- I got a training course about working processes (Agile and Scrum), soft skills, English writing & communication in working place and web development.
- I learned about creating a NodeJS server to provide the API, then using AngularJS on the Front-end side to display these data.
- **Project:** During the internship, I participated 2 projects
    - Project 1: Human management software center ISC.
        - Github: https://github.com/tienthanh2509/isc-node7
    - Project 2: Caro game web app.
        - Github: https://github.com/minhducisc/gameCaro

PERSONAL PROJECT

FoodTech Shop

07/2019 – 11/2019

My wife and I opened a shop to sell noodles and I built a website to sell products and manage the shop
- **Website:** http://www.foodtechshop.vn
- **Github:** https://github.com/huynguyen22994/YelaProject

EDUCATION

HUTECH University, Ho Chi Minh City

2013 – 2018

Degree title: Information Technology Engineer
- **Subjects included:** Management System Database, Object Oriented Programming (OOP), Programming Techniques, Software Technology, Information Security, Project Management, Tools and Software Development Environment, Design, and Analysis Database
- **The project below that I participated in when I was in school:**
    - A website sell traveling clothes (ASP.NET MVC): http://huyvu.azurewebsites.net
